

Automation Test For Candidate:

Prerequisites:

selenium server, selenium driver, java environment, IDE.

You can use any information source, and you will have to explain each step on the way, so don't just copy-paste stuff.

Think about stabilization and performance.

Good luck!

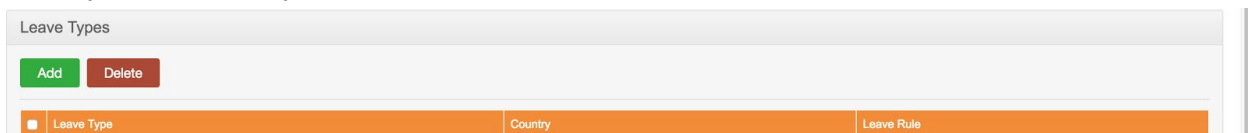

Test Steps (you need to automate these steps with selenium)

1.go to <https://enterprise-demo.orangehrmlive.com/auth/login>

2.Login as “sysadmin” (the password is on the screen)

3.Verify that “Leave Types” table is visible

Leave Type	Country	Leave Rule
------------	---------	------------

3.In the table delete “Community leave AU” and “Vacation US” items

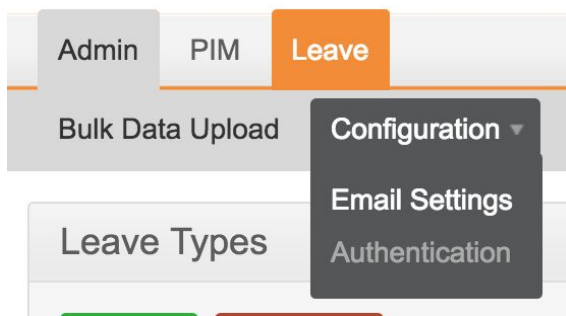

4.Add new Item with these values:

Country = “Italy”

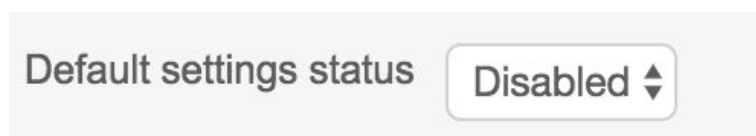

Name = <YOUR_NAME>

5.save the item.

6.Go to “Admin” -> “Configuration” -> “Authentication”

7.Enable “Default settings status”

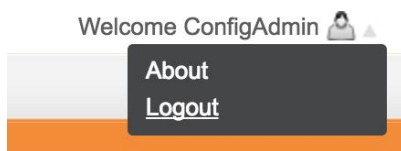

8.Enable CAPTCHA after 1 failed attempt

9. Save the configurations.

10. Logout:

11. You will get to a login page, and in the login page try to login with bad credentials (user: x, password: x)

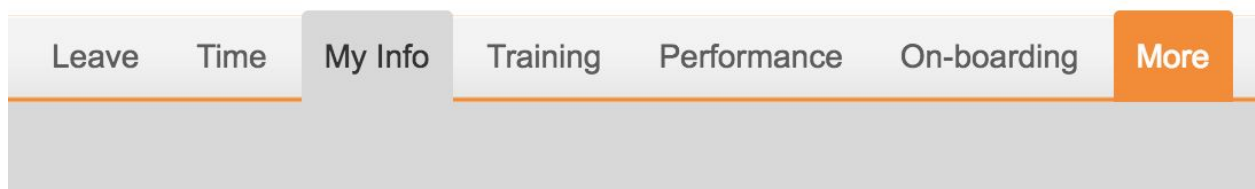

12. Verify that there is an error and that you see the CAPTCHA (if the image failed to load its ok)

A screenshot of a login form. It has two input fields: "Username *" with the value "sysadmin" and "Password *" with masked characters. Below the password field is a CAPTCHA image labeled "binaraCAPTCHA". Below the image, there is text that says "Enter the characters shown in the image" and an empty input field. Below that, it says "Letters are case-sensitive" and "Try another image if this cannot be read".

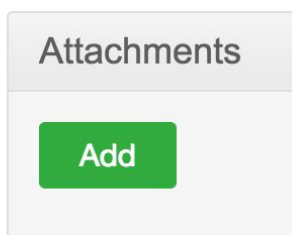

13. close the selenium driver.

13.go to <https://enterprise-demo.orangehrmlive.com/auth/login> and login as **Ess User** ("linda.anderson")

14.Go to "My Info" section:

15.(optional)Scroll down and click on "Add" under "Attachments"

16.(optional) Upload png file (any file that you will choose) with the comment “this is my file”

Add Attachment

Select File

Choose File

Screen Sh...58 PM.png

Accepts up to 1MB

Comment

this is my file

* Required field

Upload

Cancel

17. Wait and verify that the upload was successful
